- React/Vue/etc.
- Web Components
- Systems Thinking

Experience

Google, UX Engineer – Remote May 2021 - December 2023
Collaborated with UX designers to create delightful interfaces for the Google brand.
Developed production web experiences with clean, efficient, and maintainable code.
SME for accessibility compliance. Key in launching belonging.google domain.

LiveSchool, UI Architect – Remote August 2018 - May 2021
Planned and built the front-end for LiveSchool's mobile apps and website, used by teachers in classrooms to track and report student behavior in real time.

Humana, Web Developer – Louisville, KY December 2016 - July 2018
Built a library of accessible UI components based on WCAG/ARIA patterns for one of the nation's largest health insurance companies.

Apple, UI Engineer – Cupertino, CA October 2013 - June 2016
Built interfaces to support product launches and transactions on Apple.com. Led successful projects to componentize and document complex design systems and coding guidelines for use by large cross-functional teams.

CNN, Senior Web Developer – Atlanta, GA April 2013 - October 2013
I helped build the responsive redesign and replatforming of CNN.com to Node.js.

iostudio, Frontend Developer – Nashville, TN January 2012 – April 2013
I built client marketing websites and web apps for clients, including the National Guard, in an ad agency environment.

Education

Western Kentucky University – Bowling Green, KY
BA, Interactive Advertising with Graphic Design minor.
