Louisville, KY

A **creative technologist** with extensive experience building user-friendly digital products.

Skills

- HTML/CSS
- TypeScript
- React/Next.js
- React Native
- Accessibility
- Design Systems

Experience

Self-Employed (LLC), Software Engineer – Remote January 2024 - Present

- Engineering scalable, high-performance applications for startups and agencies, including native mobile apps with React Native and web apps using Next.js.
- Integrating AI-driven capabilities including intelligent suggestions, personalized recommendations, and dynamic content generation, leveraging embeddings and large language models.

Google, UX Engineer – Remote May 2021 - December 2023

- Developed production web interfaces with clean, efficient, and maintainable TypeScript code, optimizing for performance and scalability.
- Subject Matter Expert (SME) for accessibility compliance, championing inclusive design principles and ensuring that UIs met or exceeded WCAG standards.
- Played a pivotal role in the successful launch of the belonging.google domain.
- Architected coding scaffolds to simplify the creation of new projects.

LiveSchool, UI Architect – Remote August 2018 - May 2021

- Upgraded a large codebase to Vue 2 and integrated Firebase for real-time changes that reflected immediately across open tabs and devices.
- Collaborated closely with designers and stakeholders to craft architectural artifacts, including diagrams and documentation.

Humana, Web Developer – Louisville, KY

December 2016 - July 2018

- Built a library of accessible Vue 2 components for one of the nation's largest health insurance companies.

Apple, UI Engineer – Cupertino, CA

October 2013 - June 2016

- Built interfaces to support product launches and transactions on Apple.com.
- Led a successful project to harmonize competing corporate design systems and implemented major pieces of a unified SCSS library.
- Prepared coding guidelines for use by large engineering teams.
- Directed offshore teams to implement tools and libraries.

CNN, Web Developer – Atlanta, GA

April 2013 - October 2013

- Helped to re-platform CNN.com from Java to Node.js, improving feature velocity and resulting in more ergonomic and maintainable code.
- Created a responsive SCSS library for many possible page layouts.

iostudio, Frontend Developer – Nashville, TN

January 2012 - April 2013

- Built client marketing websites and web apps for clients in an advertising agency environment.
- Implemented the first responsive redesign of NationalGuard.com.

Education

Western Kentucky University – Bowling Green, KY

Bachelor of Arts, Interactive Advertising with Graphic Design minor
